

Call for Papers: Special Issue on
Statistical Applications and Methods
in Phenological Research

The *Austrian Journal of Statistics* is published quarterly since the 60's by the *Austrian Statistical Society*. Its general objective is to promote and extend the use of statistical methods in all kind of theoretical and applied disciplines. It is open-access without fees, listed in Scopus and many other indices.

In consistency with the aims and scope of the *Austrian Journal of Statistics* among the contributions to the European Geosciences Union (EGU) General Assembly 2016, up to 4–8 papers will be selected. Authors of the selected papers will be invited to prepare an extended peer-reviewed version for this special issue of the journal.

In addition to full length papers, we also encourage the submission of short articles. All submissions must contain original unpublished work not being considered for publication elsewhere.

We cordially invite you to submit your manuscript to this special issue under the section “pheno”. Please see the *Guidelines for Authors* located on the journal's web page www.ajs.or.at for further details. Authors are strongly encouraged to produce their papers using L^AT_EX, but standard Office formats might be accepted as well.

Important Dates:

- Initial submission: October 30th, 2016
- Revision: January 30th, 2017
- Tentative Publication Date: first quarter of 2017
